

TATTOO APPLICATION INSTRUCTIONS

Choose and prepare a suitable place for application:

1

Choose a hairless part of the skin for the application of the graphic. Do not apply the tattoo to an area with even a little hair, as the subsequent removal of the design will be time-consuming.

2

Before applying a washable tattoo, properly prepare the area on the body.

3

Degrease! For this purpose, use warm soapy water or an agent containing alcohol.

4

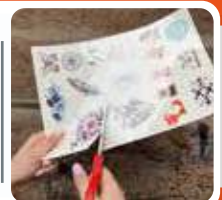

The surface to which you apply the tattoo must be completely dry. Otherwise, the sticker will not adhere to the skin.

Prepare the pattern to be applied to the skin:

1

Cut the selected design with scissors as close to its edge as possible. Tattoos do not have a cutting line – you have to give them the desired shape yourself by cutting with scissors or a knife.

2

After cutting out the image, remove the protective film from it. This is important! If you forget and proceed to the next step, your tattoo will adhere to the transparent material. Unfortunately, you will not be able to recover the design.

Apply the Tattoo:

1

Apply the cut-out graphic to the skin with the printed side down and press firmly with the palm of your hand. The design must adhere to the body with its entire surface.

2

Moisten the tattoo directly with water or a wet sponge/towel. Do this carefully, point by point, to achieve the desired effect on the skin.

3

Firmly press the design against the skin for about 30 seconds. Be careful not to move it even a millimeter.

4

Carefully remove the paper backing to avoid damaging your washable tattoo. Wait a moment for the tattoo to dry – and you're done!

5

If you want to remove the tattoo, use cosmetic oil. Wipe the skin with a soaked cotton ball. If necessary, press harder to remove any sticky residue.
